

RANDY ZHU

604-704-9500 | randy@randyzhu.com | linkedin.com/in/rzhuo8 | randyzhu.com | github.com/RandoNandoz

EDUCATION

University of British Columbia

Bachelor of Science, Honours Computer Science, Option in Software Engineering

September 2023 – April 2028

GPA: 88%

TECHNICAL SKILLS

Languages: Python, Java, C#, TypeScript, HTML/CSS, C++, C, SQL, MIPS Assembly, Swift

Developer Tools: Git, Docker, Linux

Testing Frameworks: JUnit, NUnit, PyTest, Playwright

Technologies: React.js, Google Maps API, Unity Game Engine, Express.js, Google Cloud Run, Power BI, SQL Server Management Studio (SSMS), pandas, pthreads

WORK EXPERIENCE

Research Assistant

Software Practices Lab

May 2025 – September 2025

Vancouver, BC

- Implemented **graph algorithms for static and dynamic program analysis in Python** for automated unit test generation
- Identified external dependencies to functions by extracting docstrings from objects for analysis with an open source LLM, **Gemma 3n on ollama**
- Developed the tool using Agile methodologies like **Kanban**; managed source code collaboration using **Git**
- Caught 76% of bugs and covered 85% of code base using test-driven-design by writing over 300 **unit tests in PyTest**, **mocking expensive API calls using pytest_mock and monkeypatch**

Software Developer Intern

Teck Resources

September 2024 – April 2025

Vancouver, BC

- Created calendar component used by **teams across the org** using the Power Apps Component API, React.js, TypeScript and the Microsoft Fluent UI React toolkit
- Tested web apps, catching 87% of bugs before reaching user acceptance tests using **Playwright** and **NUnit** and **C#**
- Saved over 100 hours for site engineering teams by creating a data ingest tool using the Microsoft Dataverse **REST API** in **C#**
- Presented **Power BI** dashboard of on-site safety events across business units by unifying data from legacy databases, using **SSMS**, **to wrangle data using SQL**, then finer transformations using **M**, **DAX** and **pandas** for the final dashboard

Teaching Assistant

The University of British Columbia

July 2024 – Present

Vancouver, BC

- Achieved a 98% favourable rating from students for **debugging their event-driven Swing code in Java**
- Lectured during seminars on low-level programming fundamentals like **MIPS Assembly**, **stack frames**, and **POSIX pthreads**
- Explained and solved parallel programming problems as a part of office hours using **spinlocks**, **mutexes**, and **threading**

PROJECTS

Racket Compiler | x86 assembly, Linux ABI, C, Racket (Scheme/Lisp), gdb

2026

- Implemented instruction selection and register allocation using graph colouring algorithms to minimize expensive memory reads
- Working towards support for first class functions via closure conversion, and tail call optimization to enable efficient recursion

Campus Explorer | TypeScript, React.js, express.js, Google Maps API, Docker, Google Cloud Run

2025

- Designed REST APIs and implemented them in express.js, writing middleware to route rooms using the Google Maps Routing API for cycling and walking paths
- Containerized the backend using **Docker** and **deployed the API to Google Cloud Run**
- Displayed and transformed embedded map using the Google Maps JavaScript API on React.js based frontend

Collidy Road | Unity, C#, .NET

2023

- Achieved **top 5% game quality** as rated by other players in the game jam
- In the Unity Game Engine, developed player interaction and hostile AI scripts using C#
